

Freezing Rain

Decision Support Briefing # 3 As of: 5:00 PM February 6, 2019

What Has Changed?

- ✓ No changes made to the headlines at this time.

Main Points

Hazard	Impacts	Location	Timing
Minor Ice Accumulation 	Icy roads/sidewalks.	Capital Region, eastern Greene and western Columbia counties, north/central Taconics.	Tonight through early Thursday morning.
Moderate Ice Accumulation 	Isolated power outages, downed trees, icy roads/sidewalks.	Southern Adirondacks, western Mohawk Valley, Schoharie Valley, Helderbergs, eastern Catskills, southern VT, Berkshire county in MA, and Litchfield county in CT.	Tonight through Thursday morning.

National Weather Service

Map of New York State showing the distribution of the 1990-1999 average annual precipitation. The map uses a color scale from yellow (low precipitation) to red (high precipitation). Major cities and towns are labeled, along with their corresponding precipitation values. The highest precipitation is concentrated in the northern and eastern parts of the state, particularly around the Adirondacks and the Catskills.

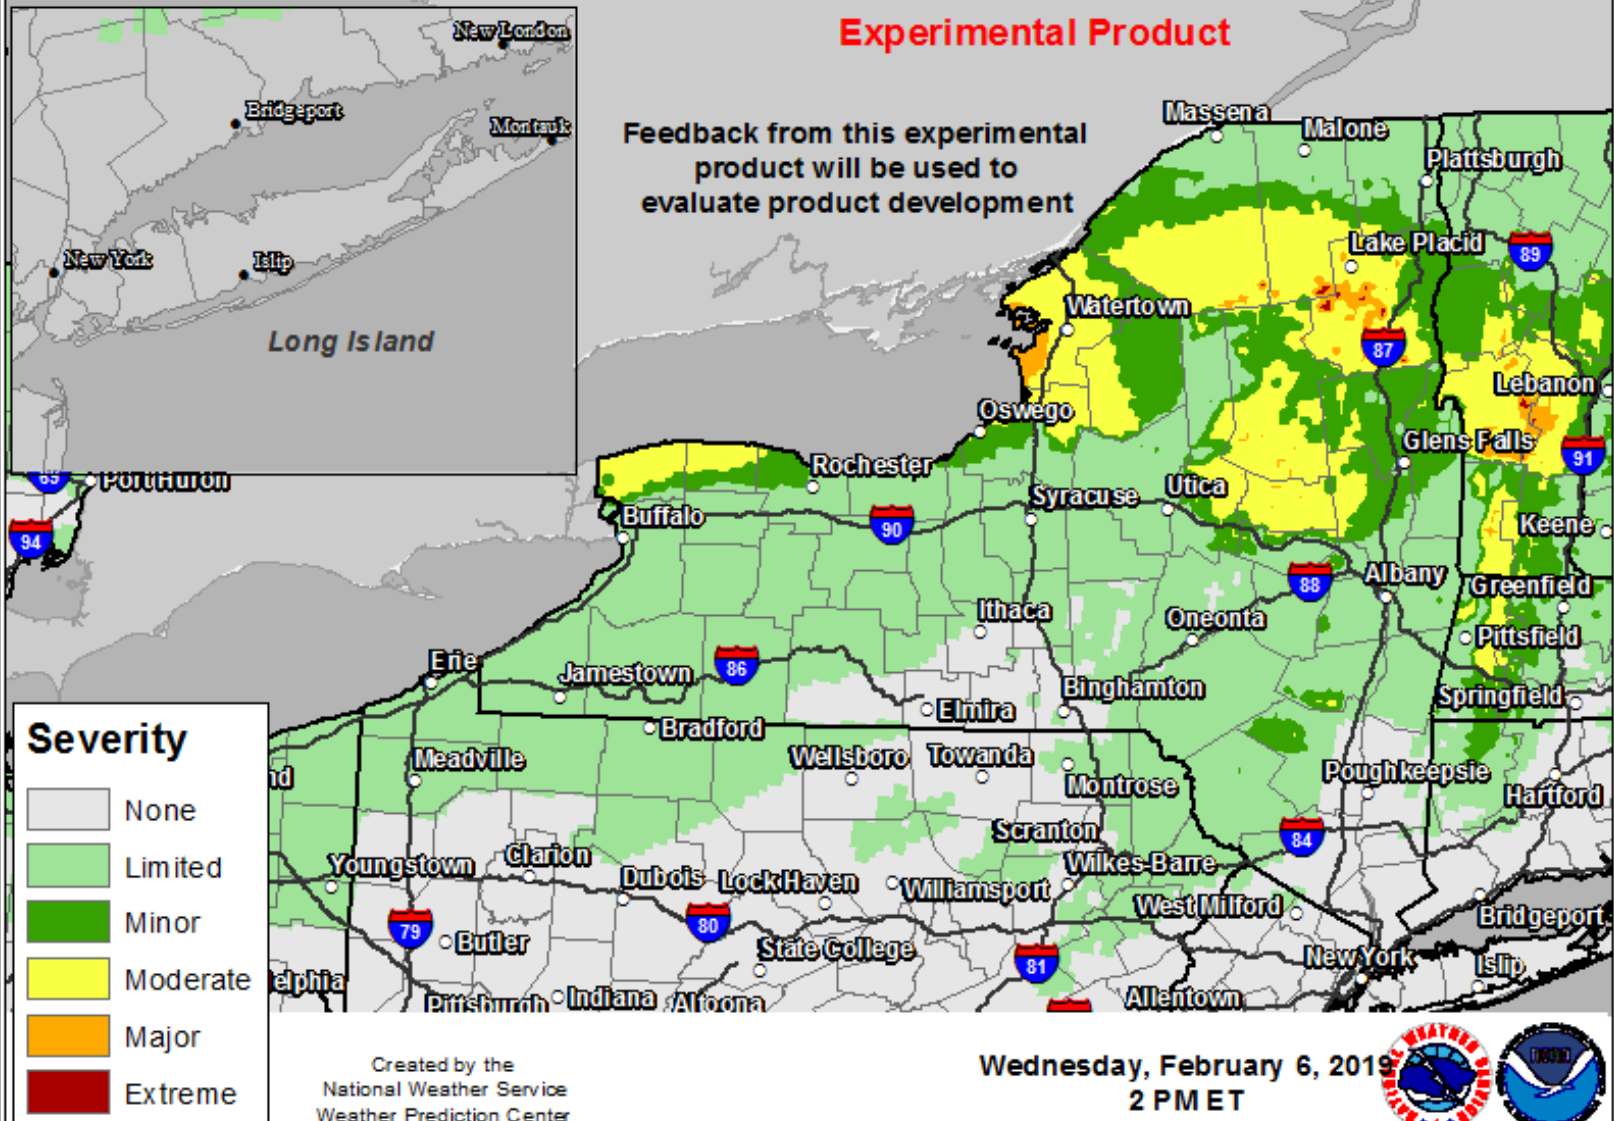

Location	Precipitation (inches)
St. Lawrence	0.19
Essex	0.06
Middlebury	0.21
Orange	0.06
Hamilton	0.12
Warren	0.16
Rutland	0.24
Windsor	0.17
