Ice Accumulations through Sunday Afternoon

Impacts and Timing:

Light freezing rain expected late tonight through Sunday afternoon

Icy/slippery conditions on untreated roads and other surfaces

www.weather.gov/aly/winter

Event Summary

Snow or a wintry mix transitioning back to snow...

- ✓ Confidence is **MODERATE** that this event will occur and **MODERATE** on expected impacts
- ✓ Period of greatest impact: Late tonight into Sunday afternoon

Snow and sleet changing to a mix of freezing rain and plain rain late Sunday morning, then changing back to snow in the afternoon. 1 to 4 inches of snow and sleet accumulation across the eastern Catskills, Schoharie Valley, central and northern Taconics of eastern New York, and western New England excluding southern Litchfield County.

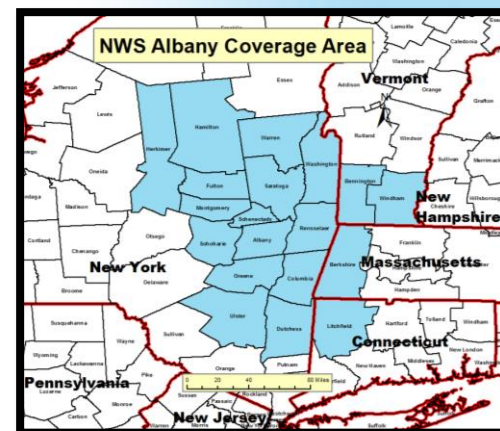

A light glaze to a tenth of an inch of ice is possible in the same locations which will make untreated surfaces slippery and difficult to travel or walk on.
