# Threat Event Summary

- ✓ **Confidence**: High confidence in a plowable snowfall. Uncertainty is if the higher end snowfall amounts are realized, which would increase the power outage threat. Highest risk for this is across southeast MA and Rhode Island.

- ✓ **What:**

Wet Snow with accumulations of 2 to 6 inches across most of the region. Higher amounts of 4 to 8 inches expected across southeast MA. A period of rain and sleet may result in lower accumulations across the Cape and Islands.

- ✓ **Where:** All of southern New England with the heaviest snow expected across southeast MA into Rhode Island.

- ✓ **When:** Beginning 6 AM, continuing into this afternoon. Heaviest snow expected from 7 am until 1 PM.
