

OVERVIEW:

- Hurricane Larry will continue to send high surf & dangerous rip currents impacting much of the MA & RI coastline thru at least Friday, and possibly lingering into Saturday.
- Greatest risk for high surf & dangerous rip currents will be at southeast facing ocean beaches.

TIMING

- High surf & dangerous rip currents Thursday, peaking Friday with impacts lingering into Saturday

HAZARDS & IMPACTS

- High surf & strong rip currents will result in very dangerous swimming conditions, especially now with most if not all beaches unguarded
- High surf will result in large breaking waves near shore, making for very dangerous conditions for anyone on rocks and/or jetties

FORECAST CHALLENGES

How quickly high surf & dangerous rip currents linger, likely into Saturday before diminishing Sunday.
