

Overview

- High confidence in accumulating snow very late tonight into Friday
 - Westward extent of accumulating snow uncertain
 - Axis of heaviest snow may shift a situation we will know when snow is on radar
- Friday morning rush hour will be impacted
- No coastal flood issues Friday & Saturday
 - Surge around 1-1.5 ft, but offshore winds (NW) & lower astro tides compared to this past weekend

Onset & Ending Time

Winter Storm Warning

 Warning area is where we have the highest confidence on impact to the Friday morning commute

Snowfall Amounts

- Heaviest snow from roughly 5-10 AM Friday
- 1 inch per hour snowfall rates possible
- Snow not expected to be wet & heavy
- Temperatures cold enough that snow will stick immediately on untreated paved surfaces
- More rain than snow on outer Cape/Islands

Summary

- High confidence in accumulating snow tonight into Friday
- Hazardous travel due to snow & reduced visibility, which will impact the Friday AM commute
- Dry, but cold & blustery Friday night into Saturday
