Valid: Jul 25, 2025

### Risk of Heat-Related Impacts

Updated: Jul 20, 2025 09:48 PM EDT

**Little to None**

- Little to no risk from expected heat.

**Minor**

- This level of heat affects primarily those individuals extremely sensitive to heat, especially when outdoors without effective cooling and/or adequate hydration.

**Moderate**

- This level of heat affects most individuals sensitive to heat, especially those without effective cooling and/or adequate hydration.
- Impacts possible in some health systems and in heat-sensitive industries.

**Major**

- This level of heat affects anyone without effective cooling and/or adequate hydration.
- Impacts likely in some health systems, heat-sensitive industries and infrastructure.

**Extreme**

- This level of rare and/or long-duration extreme heat with little to no overnight relief affects anyone without effective cooling and/or adequate hydration.
- Impacts likely in most health systems, heat-sensitive industries and infrastructure.
